Town Warrant

THE STATE OF NEW HAMPSHIRE

To the Inhabitants of the Town of Hampton Falls, in the County Of Rockingham, in said State, qualified to vote in Town Affairs:

You are hereby notified to meet at the Town Hall, in said Hampton Falls, on Tuesday, the ninth day of March next, at ten of the clock in the forenoon to act upon the following subjects:

1. To choose all necessary Town Officers for the year ensuing.
2. To raise such sums of money as may be necessary to defray town charges for the ensuing year, and make appropriation of the same.
3. To see if the town will raise the sum of one hundred dollars (\$100.00), for the control of the White Pine Blister Rust, and make appropriation of the same.
4. To raise a sum of money necessary to properly surface with oil the main travelled roads, and make appropriation of the same.
5. To transact any other business that may legally come before said meeting.

Given under our hands and seal, this twenty-first day of February, in the year of our Lord nineteen hundred and twenty.

W. H. McDEVITT,
GEO. F. MERRILL,
WALTER W. COMBS,

Selectmen of Hampton Falls.

A true copy of Warrant—Attest:

W. H. McDEVITT,
GEO. F. MERRILL,
WALTER W. COMBS,

Selectmen of Hampton Falls.

Report of School Board

To the Citizens of Hampton Falls:

The School Board will not make a lengthy report, as the condition of the schools, and the work they are doing will be fully given in the superintendent's report. . However, the board wishes to state that, with a few possible exceptions, it believes the school work has gone along very smoothly as far as teachers and scholars are concerned.

The board finds that there is no provision in the new law to find boarding places for teachers and suitable janitors for the schools. We have had much trouble since the beginning of the winter term in regard to the above named conditions. Have had to close the South School several times for a day or two because no one would board or transport the teacher. Finally Miss Myers resigned and secured a better paying position at North Hampton. The board was fortunate in securing the services of Mrs. John D. Fogg, of this town, to continue the work of teaching this school with the loss of only one day by the change.

We have had trouble at all the schools in regard to securing suitable janitors. Now that the seventh and eighth grades have to be sent out of town there are very few left that are capable of doing this work properly. Some of the teachers did the work until the weather was too severe. It has at times been almost impossible to get any one to start fires in the school houses. In these days of high salaries, people will not do this kind of work.

If our schools are to be successful we must have better co-operation from the parents and other citizens, who should be interested in this work whether they have children in school or not. The future welfare of our country depends largely upon the children of to-day, and every real American

citizen should be patriotic enough to do his or her share in this great work of properly educating and training the children.

The expenses of running our schools are increasing every year and it seems about time to make some change in our system. We should have a central school where all grades could be taught up to the ninth. If this cannot be done at present, we should at least have a suitable place provided for teaching the 7th and 8th grades. According to the new state law our school houses will have to be remodeled so that they will conform to the requirements that this law demands. The State Board recommend that the school districts change over one building each year until all are completed.

Recommendations

The School Board recommends that the following sums of money be raised and appropriated the ensuing year.

Tuition, statutory.....	\$1,200.00
Books and supplies.....	250.00
Flags.....	20.00
	<hr/>
	\$1,470.00
General expenses, teachers' salaries, etc.	2,900.00
	<hr/>
	\$4,370.00

W. A. JANVRIN,
R. F. SWAIN,
R. W. COMBS,

School Board of Hampton Falls.

REPORT OF THE SUPERINTENDENT OF SCHOOLS

To the Hampton Falls School Board:

I have the pleasure to submit my first annual report of the condition of the schools of Hampton Falls.

Since assuming the office of superintendent of this Union I have attended two Teachers' Institutes and two conferences of Superintendents, one at Plymouth for the week of Aug. 18, last, and one at Durham, for three days, the week of Dec. 19, last. I have held one general teachers' meeting for all teachers of this union. I have not been able to hold as many meetings with the teachers as I have desired, due to the press of other work, as inspection and supervision and the collection of data and reporting of the same to the State Board of Education. I have had many private conferences with the teachers, when I have given assistance, suggestions and directions regarding school management and methods of instruction.

You are very fortunate in having an excellent corps of teachers, who are working faithfully and getting good results. I was very sorry that we were not able to arrange for either a boarding place or for transportation for Miss Myers, as she was making excellent progress with her school, and a change in teachers during a year is usually very harmful. However, Mrs. Fogg is teaching and managing her school successfully, and we were exceedingly lucky to be able to get her, since there is such a great shortage of teachers.

Very shortly I plan to give standard tests to all pupils in the union, in the fundamental subjects, reading, writing, spelling, composition and arithmetic, beginning with the third grade pupils. I also plan to give similar tests later on in the spring and from the results of these tests, we shall gradually "hang up" tentative standards, which we shall expect our pupils and teachers to attain to or excel.

The organization at all our rural schools is not, in my opinion, nearly as good as it is possible for us to make it.

All our teachers are struggling with from ten to thirty pupils in as many as six to seven different grades, including the eighth. We are expected in those schools to prepare our boys and girls for High School, but it is very evident that with so many grades the class periods must necessarily be very short. Compared with our village schools, our pupils can, at best, get but from one-fourth to one-half the time given for recitations in the village. In order to obtain anything approaching a reasonable, average length for recitation periods, the rural schools have combined many classes, where really the pupils had better be in separate grades and some subjects are dropped for the time being, running a chance of having opportunity to take them the next year.

We present no inducement for retaining professionally trained teachers, other than of remaining in a mixed district school. In order to secure and hold professionally interested teachers and to compete with progressive communities, we should make all our schools desirable and attractive so far as possible, along lines considered as superior, and for which only are teachers being trained at present. A town with the situation and standing of Hampton Falls, with its schools better graded, administered with more satisfaction to teachers, pupils, and we feel sure, to parents, should be a desirable field for teachers.

It seems to me the ideal organization, for Hampton Falls with her enrollment, would be to consolidate all our schools in one central building, containing at least three class rooms, giving to one teacher the first three grades, to another the next three grades and to the third teacher the 7th and 8th grades in the Junior High work of the State program. This program calls for concrete work in several fields of knowledge, because it is believed that the development of the child in this period does not respond readily to drill and abstraction. The subjects are inspirational, instructive and experimental, in fact, most of the subjects of the Junior High School may be said to be there largely for explorational purposes. Boys or girls at this time of life little know what vocation or profession

they may later wish to follow, so we believe in bringing them in touch with many fields of knowledge, such as Mathematics, History, Foreign Language, Science and the Domestic or Practical Arts. By so doing they frequently find where their real interests lie, i.e., they sort of find themselves.

If we do not furnish this training to our boys and girls now, it is possible under the law for them to attend a Junior High School in another district, and our district will be responsible for their tuition. Furthermore, if they do not get this training, those who go away for high school work are bound to lose from one to two years time, which means a loss to them. Besides, it will be necessary to remodel considerably our present buildings, if we continue to use them, to meet with the permanent approval of the State Board of new, properly arranged buildings. Besides, probably our present buildings could be sold for much more than they originally cost. Possibly the East School could be remodeled and with an addition might serve our purposes. I recommend that the board take the proper measure to bring this matter before the voters of the district at the annual meeting to see what action they will take toward the erection of a new building, which will satisfy the most modern requirements of such a building.

On April 4, 1917, the Legislature then in session passed the following amendment:

"The fiscal year of town and special school districts beginning February 16, 1917, shall end August 31, 1918, and thereafter the fiscal and scholastic year shall end August 31, annually."

Since, as I understand, the Hampton Falls School District has never raised the money to carry their schools for the six months period from Feb. 16 to August 31, but rather for one year, only, it seems to me that we should provide for the required change in the fiscal year, surely this spring. As I understand it, the appropriations last spring were to carry our schools only to Feb. 16, 1920, leaving this spring term and any repairs made during the summer unprovided for. I recommend that the board include an article in the war-

rant calling for the amount of money needed to carry our schools till next August 31, besides the amount needed to carry them for the next fiscal year, September 1, 1920, to August 31, 1921. It is very essential that we make this change this year, particularly if the district should vote the \$5 tax on the thousand dollars of valuation, in order to get state aid for next year, as in order to get state aid, we must have raised the money necessary to run our schools for the next fiscal year, besides for the six months that we are now behind.

TEACHERS' SALARIES

I wish to call your attention to the great shortage of teachers that is threatening not only the schools of New Hampshire but the schools of the whole country. General Streeter, Chairman of the State Board of Education, in an address to the superintendents at the conference in Durham in December, pointed out this great danger to all. He said that there are already in New Hampshire, fifty schools closed for lack of teachers and that they expected there would be about eighty more schools closed after the Christmas vacation, because of the teacher shortage. Continuing, he said, "This condition seems not confined to any one section, but to prevail generally throughout the country. Nearly all the educational journals and magazines now coming to our office contain editorials and news items emphasizing that the danger from this cause threatens to impair and even destroy the efficiency of all public schools. The reason most generally assigned for these conditions is the inadequacy of salaries to hold teachers now in service or to attract new ones to that service."

To illustrate the almost panicky utterances on this question he quoted from a few of the many statements being made.

"The Bulletin of the National Education Association for November, after commenting on the increase of salaries already made, continues:

"The increases are not sufficient however, to remove the danger. Over 100,000 positions in the public schools to-day are vacant or filled by teachers who cannot pass the minimum tests for teachers' certificates. Strong teachers are leaving

the profession because of inadequate pay. Positions are being filled by immature and untrained teachers. It is estimated that the number of teachers below 21 years of age has, during the last year, increased by not less than 25 per cent.

“An investigation made by this Association shows that the attendance at teacher training institutions has decreased over 20 per cent since 1916. It is high time, not only for the teachers, but the public, to give serious consideration to the teacher problem.’

“On Dec. 6, Governor Runyon of New Jersey issued a general proclamation to the people of that state, in which he said, ‘Unless the people and members of School Boards are aroused to the great peril that is now threatening, the 600,000 in our New Jersey schools to-day, and perhaps a whole generation of other children, may be made the victims of a demoralized and broken down educational system.

“The crisis is rendered acute by the alarming scarcity of teachers and that scarcity is due to the low salaries paid. Already the teacher scarcity has caused the lowering of educational standards and even the suspension of classes throughout the state. It has made necessary the hiring of teachers inadequately trained for the work. Serious as this situation is, it is only the beginning of what may become the gravest crisis the schools of New Jersey have ever faced. It is a crisis that is not limited to New Jersey alone, it looms as a menace to the whole country, to all the public schools in all the states.

“New Jersey, therefore, faces the immediate prospect of closing schools or of drawing into the teaching profession a still larger number of those inadequately trained and without any special preparation for the work. If our children are to be taught by incompetent teachers, or are not to be taught at all, the end of American democracy, as we know it, is in sight.’

“There is now pending in the Ohio Legislature a resolution reciting the threatening conditions where hundreds and perhaps thousands of Ohio school classes will be without teachers and closes with the following:

“Be it further Resolved; That the General Assembly

request the governor of the state by proclamation to ask that all forces of the state join this educational crusade by addresses and by printed advertisements which will recruit the ablest young men and women of Ohio as teachers in our public schools.”’

In the Boston Sunday Herald of Dec. 28, Dr. Thomas, State Superintendent of Public Schools for Maine, published a statement, to the effect that 80 schools were then closed because of the teacher shortage and that the number would shortly be greatly increased. Besides, he said, “If present emergencies are not met at the coming town meetings, there will be 500 schools closed next autumn at the best calculation, and many other schools will be opened by girls of no training and less than 20 years of age.” Furthermore he gave the following statistics:

“Out of 650,000 teachers in the United States, 143,000 left the profession last year. In four years the graduates of normal schools in the United States decreased 30 per cent. One hundred thousand positions are without teachers or filled with teachers below the standard, and yet we have never, in the history of America, realized as we do now the relation of education to free government. Nor have we realized before as now, what our schools mean to our country.”

These foregoing statements from the widely separated states of Maine, New Jersey and Ohio, are only illustrative of country wide conditions.

General Streeter further informed us that from statistical experience we might expect in New Hampshire the withdrawal of between 400 and 450 teachers at the end of the present year. Our two normal schools will graduate less than 100, which is about the usual number. He said, “There is no certainty of filling the vacant places with a sufficient number of competent teachers. It seems absolutely essential, however, that our school boards and all other citizens interested in our schools should realize that an emergency confronts us and prepare themselves to co-operate with the State Board in all sensible and practical ways to meet the emergency.”

One thing which I wish to suggest to the board is to give careful consideration to the advisability of the district employing a Red Cross nurse as a school or district nurse. We have such a nurse in Hampton this year who is employed jointly by the local Red Cross Chapter and the school board, as the school and community nurse. In Hampton Falls we have medical inspection, which is very important; however, the "follow-up" work that the district nurse does in the homes of the community is fully if not more important than merely medical inspection. If Hampton Falls can not have a nurse of its own, possibly Hampton or some other town would be pleased to consider the employment of such a nurse jointly and possibly one or more other towns might wish to enter the combination.

I have collected some school statistics for 1918-19 as a part of this report, from which you will see your per cent. of attendance for last year was 87.65 and the number of tardinesses was 116. The attendance was much less than it should be, even allowing for the epidemic of influenza and other sickness, and the number of tardinesses was too great. Tardiness and attendance are two of our big problems and a falling down in either is of great injury to the best work of the school. We appeal to the parents for their co-operation, to the effect that we may have better attendance and much less tardiness in the future.

I wish very much to attend the Columbia Teachers' College for about six weeks next summer, in order to take two or three courses pertaining to school supervision and administration, and have already obtained the permission of the State Board of Education to do so. I trust all the boards of my union will as readily grant me this privilege, since such courses should increase my efficiency as your superintendent.

In closing, I wish to express my appreciation of your counsel and cordial support, and of the co-operation of the parents and teachers in making the school work a success.

Respectfully submitted,

C. H. WALKER.

EXETER, N. H., January 31, 1920.
